

Anushka Sharma

Product Designer • UI/UX Designer

✉ anushkaadesign@gmail.com  sanushkaa4  anushkaadesign  Ontario, Canada

Summary

Product designer with 4+ years shipping products for B2B SaaS, government tools, and e-commerce, from user research to token based design systems. AI-first workflow with Figma Agent and Claude Code for fast, high-fidelity prototyping.

Experience

Product Designer

Apex Accounting

May 2025 – Present

Toronto, ON, Remote

- Redesigned a 25+ page product site across 12 service lines and 6 service areas, defining the sitemap, navigation model, and page hierarchy.
- Designed a reusable landing-page template system so new location pages launch consistently without rebuilding IA each time, cutting time-to-launch and supporting local search and onboarding.
- Cut page load from 7s to 3s (57% faster), by simplifying layouts, compressing images lowering bounce on the main lead-generation path.

Product Designer

Freelance

Feb 2022 – Present

Remote

- Design websites and mobile apps for 10+ small-business clients across IT, telecom, food service, retail, owning discovery, information architecture, interaction and visual design, and prototyping through handoff.
- Run each engagement end to end, translating non-technical business goals into defined product and design scope.
- Built a design-token system in Figma using Variables (color, typography, spacing), mapping primitive tokens to semantic tokens with light/dark modes.
- Use Figma Agent and Claude Code for Figma designs and prototypes, testing flows with clients on real interactions.

Product Designer

Banhmi and Bites (Co-op)

Jan 2025 – Apr 2025

Strathroy, ON, Canada

- Designed a direct to consumer e-commerce storefront end to end, from wireframes and user flows through high-fidelity UI for catalog, cart, and checkout.
- Designed Stripe checkout flows covering payment, error, and confirmation states, and delivered dev-ready specs, component documentation, and prototypes.
- Translated the owner's business goals into product scope through documentation, presentations, and iterative feedback.

UI/UX Designer

Core Software Integrated

Sept 2021 – Jul 2023

Kathmandu, Nepal

- Owned end to end design across 4 client projects, running discovery workshops and translating requirements into journey maps, personas, and wireframes.
- Built a 25+ component design system (typography, forms, navigation) adopted across all 4 projects, cutting repeated rebuilds by 34%.
- Designed a bilingual (Nepali/English) mobile census app for a municipal government, replacing paper forms for 1,729 households and 6,554 residents with one-visit digital surveys and GPS-tagged proof of visit.
- Ran usability tests with 5 field surveyors on census-app prototypes, uncovering navigation and data-entry issues that reshaped the survey flow before rollout.
- Sole designer of a multi-tenant B2B SaaS customer engagement platform (unified inbox, embeddable chat widget, contact management) defined its IA and four-phase build roadmap.

Skills

UX Design: User-Centered Design, Design Tokens, Cross-functional Collaboration, User Flows, WCAG 2.2, Agile

User Research: User Interviews, Usability Testing, Qualitative & Quantitative Research, Competitive Analysis, Surveys, A/B Testing, Usability Metrics, Data Visualization & Analysis

Visual Design: UI Design, Mockups, Responsive Layout, Design Specs/Handoff, Adobe Photoshop, Illustrator

Tools: Figma, FigJam, Figma Motion, Framer, Miro, Whimsical, Maze, Excalidraw, Claude Code, Handy, Codex, OpenCode

Engineering: HTML, CSS3, Bootstrap, MERN, JavaScript (ES6+), Bun, TypeScript, Git

Education

Postgraduate, Full Stack Software Dev

Lambton College, Ontario, Canada

2023 – 2025

B.E. in Computer Engineering

Kathmandu University, Kathmandu, Nepal

2016 – 2021
