Summary

User-centered product designer with 4+ years of experience in UI/UX design across civic tech, B2B SaaS, and e-commerce. Skilled in user interviews, usability testing, information architecture, and design systems, front-end experience.

Experience

Product Designer

Apex Accounting

May 2025 – Present

Toronto, ON

- Redesigned a 25+ page website across 12 service lines and 6 service areas, defining the sitemap, navigation model, and page hierarchy.
- Cut page load time from 7s to 3s (57% faster), reducing bounce rate on a lead-generation site via image compression, plugin audit and cleanup, and migration from Bluehost to Kinsta.
- Ship location-specific landing pages on an ongoing basis, supporting local search and onboarding new customers.

Product Designer

Freelance

Feb 2022 – Present

Remote

- Design websites and mobile apps for 10+ small-business clients across IT, telecom, food service, and retail, owning discovery, information architecture, interaction and visual design, and prototyping through developer-ready handoff.
- Manage the full client lifecycle: scoping, proposals, timelines, and client communication, translating non-technical business goals into defined design scope.

Product Designer / Full-Stack Developer

Banhmi and Bites (Co-op)

Jan 2025 – Apr 2025

Strathroy, ON, Canada

- Designed and shipped a DTC e-commerce storefront, owning the work from wireframes through production code.
- Owned front-end development, building responsive React.js and Tailwind CSS interfaces for an e-commerce product.
- Developed RESTful APIs (Node.js and Express.js) powering front-end flows like checkout (Stripe), cart, and catalogs.
- Translated the owner's business goals into product through documentation, multiple presentations, and iterative feedback.

UI/UX Designer

Core Software Integrated

Sept 2021 – Jul 2023

Fresno, CA

- Led design from discovery through delivery: requirements workshops, information architecture, journey maps, personas, and wireframes.
- Built a 25+ component design system (typography, forms, navigation) adopted across 4 projects, eliminating repeated rebuilds.
- Designed a bilingual (Nepali/English) census app for a municipal government covering 1,729 households and 6,554 residents, replacing paper forms with digital single-pass capture, GPS-tagged proof of visit, and field-worker deployment.
- Sole designer of a multi-tenant B2B SaaS customer engagement platform: unified inbox, embeddable chat widget, and contact management.
- Defined the IA, design system, and four-phase build roadmap (support, marketing, sales, operations) for the above product.

Skills

UX Design: User-Centered Design, Design Tokens, Cross-functional Collaboration, User Flows, WCAG 2.2 AA, Agile
User Research: User Interviews, Usability Testing, Qualitative & Quantitative Research, Competitive Analysis, Surveys, A/B Testing, Usability Metrics, Data Visualization & Analysis
